

YOHANNES DESALEGN

Software Developer | Full-Stack Engineer | Cybersecurity Analyst
yohanness1621@gmail.com | github.com/yohanness16 | linkedin.com/in/yohannes-desalegn | Addis Ababa, Ethiopia

SUMMARY

Final-year Electrical and Computer Engineering graduate (AASTU, 2025) with a strong record of building and shipping production-level full-stack applications, cloud infrastructure, and security tooling independently. Proficient in React, Next.js, Django, Hono.js, Azure with Terraform, and penetration testing. ALX Cybersecurity Professional (7-month intensive). Applies security-first thinking to every system built.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Bash, SQL

Frontend: React.js, Next.js 14, Tailwind CSS, Framer Motion

Backend: Hono.js, Django, Node.js, Express.js, FastAPI, Drizzle ORM, Supabase

Cloud & DevOps: Microsoft Azure, Terraform, Docker, Nginx, GitHub Actions, Linux

Cybersecurity: Nmap, Wireshark, Burp Suite, Metasploit, OWASP Top 10, OSINT, Kali Linux

PROJECTS

Real-Time Public Transport Tracking System | *Next.js 14, fastapi, WebSocket, PostgreSQL, Azure Maps*

- Live city-bus tracking platform pushing GPS updates to commuters every 2 sec via WebSockets; fastapi backend ingests vehicle location events, persists route history to PostgreSQL, and serves ETA queries via REST.
- Azure Maps integration for route visualisation; all infrastructure (App Service, PostgreSQL Flexible Server, Azure Maps) provisioned with Terraform from a single GitHub Actions pipeline.

NetRecon — Automated Penetration Testing & Reconnaissance Suite | *Python, Bash, Nmap, Wireshark, OWASP*

- Modular Python/Bash pipeline chaining Nmap scanning, service fingerprinting, DNS enumeration, and WHOIS into one reproducible workflow with structured JSON reports per target.
- Automated OWASP Top 10 surface checks (SQLi, XSS, open redirects, misconfigured headers); passive Wireshark captures run alongside active phases for network-layer correlation.

Cloud Infrastructure Automation — Azure IaC Pipeline | *Terraform, Microsoft Azure, GitHub Actions*

- Reusable Terraform modules provision Azure VNets, NSGs, App Services, and PostgreSQL — full environment spin-up in under 10 min; GitHub Actions runs plan on PR and apply on merge to main.

PC Repair System — Workshop Inventory & Job Management | *Django, React, TypeScript, PostgreSQL*

- LAN-deployed full-stack repair management system: Django REST backend handles job tickets, parts inventory, and technician roles; React + TypeScript frontend with live status dashboards and role-based access control.

EDUCATION

B.Sc. Electrical and Computer Engineering

2021 – 2025

Addis Ababa Science and Technology University (AASTU) · Addis Ababa, Ethiopia

- Coursework: Computer Networks, Operating Systems, Data Structures & Algorithms, Embedded Systems, Information Security

CERTIFICATIONS & TRAINING

ALX Cybersecurity Professional Certificate · ALX Africa

2024

- 7-month hands-on programme: penetration testing, vulnerability assessment, SIEM, threat intelligence, incident response, SOC workflows — aligned to NIST and OWASP frameworks.

Microsoft Azure Fundamentals AZ-900 (in progress) | TryHackMe — Penetration Testing & SOC Analyst paths (active)
